

New Training

Get an **expert-level understanding** of the MMUCC Guideline by participating in the online training available on this site. Updated MMUCC training will be released in fall of 2008 – watch this space for details.

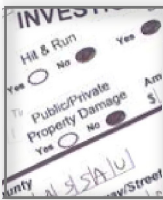

Testimonials

MMUCC Guidelines

As more states use MMUCC to improve their crash reporting systems, state DOTs and DMVs, policymakers, and police officers say the Guideline has helped them use the data to make roadways safer and more efficient. [Find out here what some of them are saying about MMUCC.](#)

News & Updates

Section 408 Grants

Here's everything you need to know about SAFETEA-LU Section 408 grants that can help you **improve your crash data collection systems**, including requirements and deadlines to apply for funding.

Discussion Forum

This section allows users to **share information about the Guideline**. Also available: news releases, newsletter/web articles and HTML alerts.

FAQ

States that adopt the MMUCC Guideline see immediate benefits, and when they incorporate its data elements into their crash reporting forms and systems, they are surprised at how easy it is to use. [Here are answers to the most commonly asked questions about MMUCC.](#)

New 2008 Standards

MMUCC was developed by a panel of highway safety experts from all over the country representing a wide range of disciplines. The Guideline is updated every five years to reflect changing conditions, and the new **2008 version of MMUCC** was just released.
